Summary

I build custom systems for service businesses: booking and scheduling, operations automation, and AI put inside processes that already run. Every project starts with what the business is losing today, not with a feature list. Delivered across healthcare, retail, sports, education and fintech, always as code the client owns.

Skills

Frontend	React, Next.js, Vue.js, Redux, TailwindCSS, TypeScript
Backend	Node.js, Express.js, NestJS, Python, PHP, Laravel
AI & Automation	OpenAI API, Anthropic Claude, LangChain, Gemini AI, Whisper, RAG
Blockchain	Solidity, ERC-20/ERC-721, Polygon PoS, Web3.js, Chainlink, Solana / SPL
